

YEAR 12 WORK EXPERIENCE

SIXTH FORM

I have really enjoyed my time on work experience.

I have received training in several different aspects of the business such as, how to operate the till system, correct use of the various equipment used for food and drink preparation, customer service and food handling.

I feel that I have definitely enhanced my communication skills during this week as I have been front facing to members of the public, so I am really pleased that I was given this opportunity.

**Wellingtons Cafe- Cherry Lane
Garden Centre**

During this week I have been involved in Primary School visits and tours, on the incredible 'The Journey' exhibition here at the museum, learning about how younger students learn.

I have also tried my hand at gardening and learnt the correct method for replanting roses in the memorial garden so that they continue to flourish.

I have learnt a lot in the few days that I have been here, with loads of things still to come and it has been an enjoyable and valuable experience for me.

YEAR 12 WORK EXPERIENCE

SIXTH FORM

I have had a great time at my placement; my feet are tired but that means that I have worked hard which feels great!

I have shadowed members of staff and learnt a lot about how to effectively care and support the older generation with various needs. I have watched and learnt about manual handling, served multiple meals and managed large scale table settings along with providing refreshments and support wherever it was needed.

I have gained so much confidence and enhanced my communication skills, so it has been a very worthwhile experience.

Lound Hall Care Home

My placement has been a fun and inspirational experience. I have worked with a variety of age ranges within the primary setting which has given me a real insight into the curriculum and the different levels of learning.

I have learnt how children respond differently to various situations and how they learn and I have gained experience on how to adapt tone, patience and expectations and have been actively involved in monitoring and assisting students. I have worked on some amazing activities such as phonics, counting, child led learning and play and geography and science.

This placement has been fantastic for me and I am so glad that we get the opportunity to do this in Year 12.

Rampton Primary School

YEAR 12 WORK EXPERIENCE

SIXTH FORM

This week has helped me to decide on what I want to do in the future so it has been really eye opening and helpful.

I have learnt so much about teaching students with SEND, the different strategies that are used and the curriculum that they cover. I have been active in cooking, a Coehlo and Tolkien class, Maths and even got to help in a Drama enrichment session!

It's been a wonderful experience getting to know the students and getting involved in all of the activities.

St Giles School

Welcome to

St Giles School
No Dreams Are Out of Reach

I have really enjoyed my week and have worked with wonderful people in a calm and friendly environment which has been lovely.

I have learnt all about orders and picking, stock management and rotation and the basics of sales.

I feel that this experience has helped me boost my organisational skills, my knowledge of computers and IT systems and it has definitely helped my communication skills.

Just Cards Direct

YEAR 12 WORK EXPERIENCE

SIXTH FORM

My work experience has made me feel inspired and enriched, I have been kept really busy so it is tiring but completely worth it!

I am doing two placements and one is a virtual experience with Springpod so I am really challenging myself.

I have learnt some invaluable skills during the course of the week. I have been baking and decorating, dealing with stock, updating social media pages and then switching to webinars, quiz questions and written accounts....

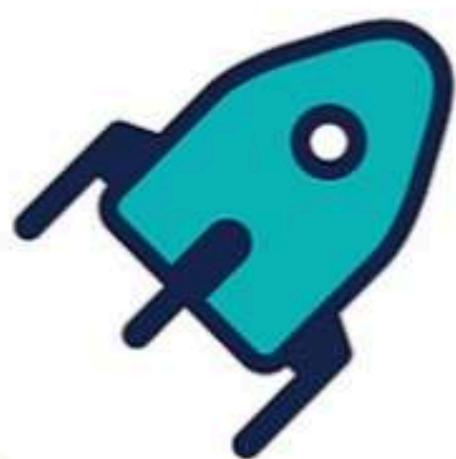

I have even managed to complete my Food and Hygiene Level 2 qualification.

My teamwork skills have really been enhanced through these placements and my ability to see what skills are required for different roles.

Along with this I have also gained skills and understanding in the technical details of photography and lighting techniques, customer service, time management and general health and safety.
